School closure due to COVID-19

The Coronavirus spreads from one person to another.
The virus can spread easily if people are close together.

To help stop the coronavirus spreading, schools might close.

This helps stop the virus spreading easily as people are further apart.

I will stay at home when my school is closed.
My teachers might send work home for me to do.

Once the Coronavirus has gone I will be able to go to school and all my favourite places again.
